A BILL

To amend title XVIII of the Social Security Act to provide for the coordination of programs to prevent and treat obesity, and for other purposes.

- 1 Be it enacted by the Senate and House of Representa-
- 2 tives of the United States of America in Congress assembled,
- 3 SECTION 1. SHORT TITLE.
- 4 This Act may be cited as the "Treat and Reduce Obe-
- 5 sity Act of 2021".
- 6 SEC. 2. FINDINGS.
- 7 Congress makes the following findings:

1	(1) According to the Centers for Disease Con-
2	trol and Prevention, about 41 percent of adults aged
3	60 and over had obesity in the period of 2015
4	through 2016, representing more than 27 million
5	people.
6	(2) The National Institutes of Health has re-
7	ported that obesity and overweight are now the sec-
8	ond leading cause of death nationally, with an esti-
9	mated 300,000 deaths a year attributed to the epi-
10	demic.
11	(3) Obesity increases the risk for chronic dis-
12	eases and conditions, including high blood pressure
13	heart disease, certain cancers, arthritis, mental ill-
14	ness, lipid disorders, sleep apnea, and type 2 diabe-
15	tes.
16	(4) More than half of Medicare beneficiaries are
17	treated for 5 or more chronic conditions per year
18	The rate of obesity among Medicare beneficiaries
19	doubled from 1987 to 2002 and nearly doubled
20	again by 2016, with Medicare spending on individ-
21	uals with obesity during that time rising proportion-
22	ately to reach \$50 billion in 2014.
23	(5) Men and women with obesity at age 65 have
24	decreased life expectancy of 1.6 years for men and
25	1.4 years for women.

1	(6) The direct and indirect cost of obesity was
2	more than \$427.8 billion in 2014 and is growing.
3	(7) On average, a Medicare beneficiary with
4	obesity costs $\$2,018$ (in 2019 dollars) more than a
5	healthy-weight beneficiary.
6	(8) The prevalence of obesity among older indi-
7	viduals in the United States is growing at a linear
8	rate and, if nothing changes, nearly one in two (47
9	percent) Medicare beneficiaries aged 65 and over
10	will have obesity in 2030, up from slightly more
11	than one in four (28 percent) in 2010.
